

The screenshot shows the 'Matrix' window of the software. It has a menu bar with 'LCS', 'File', 'Matrix', and 'Help'. Below the menu bar are navigation buttons: a vertical double-headed arrow, a left-pointing arrow, and a right-pointing arrow. The main area is a table with three columns: 'Output 1', 'Output 2', and 'Output 3'. The rows are labeled 'Bus 17' through 'Bus 32'. The 'Output 1' column contains numerical values, and the 'Output 2' and 'Output 3' columns contain power factor values (indicated by a small 'PF' icon).
